

**Homework 4**  
**OOP & Software Architecture**  
**Due to 9th of October**

Please download a Java project from Moodle. It has intentionally injected issues that violate SOLID and OOP principles. Please fix them and submit your work as a zip archive. You need to submit **2 zip archives**. First should contain **original code with your comments explaining what the issues are**. The second one should be source code with your fixes.

**Your work should be compiling, otherwise you will get 0.**

**Good Luck!**
